

STUDY SKILLS & LANGUAGE DEVELOPMENT

Building Stronger Academic English

Clearer Thinking, Better Communication.
Greater Opportunities.

Academic English is more than learning difficult words. It is the ability to understand complex ideas, express your thoughts clearly and communicate with confidence in academic and real-world situations. With the right strategies and regular practice, you can develop the skills you need to achieve your goals.

builds a brighter future.”*

01

Build Vocabulary Through Context

LEARN WORDS. USE IDEAS.

Memorising word lists may help you recognise new words, but meaningful progress comes from understanding how words are used in context.

- Learn vocabulary through sentences, articles and discussions.
- Notice common word combinations (collocations).
- Make your own example sentences.
- Use a vocabulary notebook to keep new words.

Example in context

Basic: “The change was significant.”

Academic: “The findings indicate a significant improvement in students’ performance.”

02

Read Actively and Think Critically

READ SMART. UNDERSTAND BETTER.

Active reading helps you identify the main argument, recognise supporting evidence and remember key information.

- Ask questions as you read.
- Think about the writer’s purpose.
- Look for supporting details.
- Consider alternative viewpoints.

Try the three-pass method

- 1 **First pass** – identify the topic and main idea.
- 2 **Second pass** – highlight key points, evidence and examples.
- 3 **Third pass** – summarise the text in your own words.
- 4 Note unfamiliar words in context.
- 5 Retell the main idea in your own words.
- 6 Check that each key point is supported by evidence.
- 7 Explain how the evidence supports the main idea.

03

Write with Structure and Clarity

GOOD WRITING SHAPES GOOD THINKING.

A well-structured paragraph makes your ideas easier to understand. Use a clear structure to guide your reader.

A simple paragraph structure

Element	Purpose
Point	State your main idea.
Explanation	Clarify what you mean.
Evidence	Add an example or reason.
Link	Connect to the next idea.

Example paragraph

Online learning can increase educational flexibility because students may access lessons at different times. For example, recorded explanations allow learners to revisit difficult concepts. This flexibility helps students manage their time and balance other responsibilities.

Build Academic English: Practise with Purpose

Practical skills. Real progress. A brighter future.

Big Progress* ♥

Reading

Practise Task

Read a short academic article (250–300 words) on a current topic and identify the main idea and two supporting details.

Why it helps:

Builds comprehension, critical thinking and familiarity with academic language.

Writing

Practise Task

Write a short paragraph (100–120 words) on a given topic using formal language and clear structure.

Why it helps:

Improves organisation, grammar accuracy and ability to express ideas with precision.

Speaking

Practise Task

Talk for 1 minute on a current issue. Use the claim–reason–example structure.

Why it helps:

Builds fluency, confidence and the ability to support your ideas logically.

Listening

Practise Task

Watch a short academic lecture or talk and take 5 key notes. Then summarise the main points in your own words.

Why it helps:

Strengthens listening skills, note-taking and understanding of complex ideas.

6 Tips — What to Do & Why It Works
