A NEW ERA OF INTELLIGENCE

We are living in a time of remarkable change. Artificial Intelligence (AI) is transforming how we learn, work and solve problems. But does this mean human intelligence is no longer important? Not at all.

The next decade is not about humans vs machines, but about humans with machines — combining the best of both to create a smarter, kinder and more sustainable world.

*The future does not
belong to AI alone,
but to people who
know how to use it
wisely.*

WHAT IS HUMAN INTELLIGENCE?

Human intelligence goes beyond knowledge. It includes reasoning, creativity, emotional understanding, social skills, moral judgement and the ability to find meaning.

WHAT IS ARTIFICIAL INTELLIGENCE?

AI refers to computer systems that can learn from data, recognise patterns, process information and perform tasks such as language generation, image analysis and decision support.

TWO FORMS OF INTELLIGENCE. A STRONGER TOMORROW.

SWOT ANALYSIS

HUMAN INTELLIGENCE vs ARTIFICIAL INTELLIGENCE

*Different Strengths.
Greater Possibilities.*

STRENGTHS

HUMAN INTELLIGENCE

- Emotional understanding
- Creativity and imagination
- Moral judgement and ethics
- Adaptability and intuition
- Ability to find deeper meaning

ARTIFICIAL INTELLIGENCE

- Fast data processing
- Handles large amounts of data
- High accuracy and consistency
- Works 24/7 without fatigue
- Excels in pattern recognition

WEAKNESSES

HUMAN INTELLIGENCE

- Subject to bias and emotions
- Prone to mistakes
- Limited memory capacity
- Slower in processing large data
- Can be influenced by stress and external factors

ARTIFICIAL INTELLIGENCE

- Lacks empathy and emotions
- No real understanding of context
- Dependent on quality of data
- Cannot make moral judgements
- Limited creativity and originality

OPPORTUNITIES

HUMAN INTELLIGENCE

- Collaborate with AI for innovative solutions
- Focus on uniquely human skills
- Create more meaningful and ethical technologies
- Use AI to enhance education, healthcare and global progress

ARTIFICIAL INTELLIGENCE

- Support humans in decision-making and problem-solving
- Transform industries and create new job opportunities
- Improve access to education and healthcare
- Help build a more sustainable and inclusive world

THREATS

HUMAN INTELLIGENCE

- Risk of over-reliance on AI
- Possible loss of critical thinking skills
- Job displacement in certain sectors
- Ethical misuse of AI technologies
- Growing gap between those with and without access to AI

ARTIFICIAL INTELLIGENCE

- Potential for misuse (e.g. deepfakes, cybersecurity risks)
- Lack of accountability
- May reinforce bias in data
- Could widen social and economic inequality
- Risk of losing human control if not regulated

**HUMAN POTENTIAL
INSPIRES PROGRESS**

**AWARENESS OF LIMITATIONS
LEADS TO BETTER SOLUTIONS**

**TOGETHER WE CAN
ACHIEVE MORE**

**RESPONSIBLE USE
BUILDS A SAFER TOMORROW**

**A BRIGHTER
TOMORROW
TOGETHER**

**HUMAN VALUES
GUIDE TECHNOLOGY**

FINAL THOUGHT

The future is not about choosing between humans and machines. It is about combining human values, creativity and empathy with the power and precision of AI. When we work together, we can create a smarter, kinder and more sustainable world for generations to come.

*"Smarter Technology.
Stronger Humanity."*
